

Abbotsford Patent Lawyers

Abbotsford Patent Lawyers - Our company leads the way in intellectual property law. We have an Intellectual Property (IP) Group with various technological expertise specializing in the use, exploitation, development and protection of intellectual property and information technology.

Our team is experienced and knowledgeable at trade-mark applications, registrations and patent applications. Our members have helped with a lot of industrial design registrations and applications.

Various scientific and legal backgrounds are necessary to be able to provide useful legal recommendation concerning complex and specialized IP-related concerns. Our professionals have studied the sciences at advanced levels. Some have engineering degrees while others have graduate degrees in the fields of chemistry, physics, biotechnology, electronics, engineering physics, and electrical engineering. Amongst our group are members with doctoral degrees in analytical chemistry, nutrition and metabolism, applied chemistry, plant biogenetics, genetics, oncology and telecommunications. Advanced scientific backgrounds along with considerable experience at the bench equip our scientific experts with exceptional expertise and skills.

The Industry

Intangible property could be the most valuable property in lots of research organizations and businesses. The control of this crucial intellectual property requires the acquiring of cost-efficient and effective protection. Technology, telecommunications, and cultural industries are fundamental to the nation's economic health and growth. To ensure continued economic success, industries must have a well-developed intellectual property strategy.

Gaining access to the rights of others through licensing-in or cross-licensing as their is a trend to protect the results of research prior to public dissemination grows. Therefore, flexibility in an intellectual property position can serve the dual purpose of securing a niche market and providing an asset so as to create opportunities for additional revenue flow through licensing. A research-oriented or start-up organization could attain substantial advantages by combining intellectual property assets through cross-licensing with those of a large worldwide firm.

Protecting Intangible Assets

For several businesses in today's competitive climate, intangible assets like brands, trade secrets, and goodwill are normally at the heart of commercial success. Therefore, protecting intangible assets, that could include a significant part of their value, is an essential approach to business.

Inter-disciplinary Approach
