

Immigration Attorney Abbotsford

Immigration Attorney Abbotsford - These days there is increasing concern around privacy problems and the complexity of new privacy legislation. Organizations and individuals that develop or supply biotechnology or information technology have various legal needs. So do individuals who rely on technology to secure a competitive advantage for their company, or just to function in everyday operations. Our Technology, Privacy and Intellectual Property lawyers help clients in maximizing the use of intellectual property in their business operations. Our goal is to be able to create value for our clients.

We offer several legal services dealing with issues associated to biotechnology, intellectual property and privacy technology from a local to an international basis. Our services comprise trade-marks, copyright, privacy, commercialization, domain names, e-commerce, information technology, intellectual property and operational issues.

Intellectual Property Services:

- Copyright
- Industrial Designs
- Licensing
- Trade Secrets
- Trade-marks

We help clients in obtaining, maintaining and enforcing intellectual property rights on a regional, national and international scale. Our clients come from various industries like entertainment, automotive, telecommunications and manufacturing.

Technology Services:

- e-commerce initiatives
- development, protection, distribution, licensing and sale of technology
- acquisition of technology

To both suppliers and users of technology, we advise a lot of financial institutions and venture capitalists in structuring loan transactions. We can likewise assist businesses with their confidentiality agreements, computer system and Internet usage policies, outsourcing arrangements, consulting agreements, source code escrow, employment agreements, joint ventures and strategic alliances.

Privacy Services:

We help organizations, employees, suppliers and contractors to guarantee compliance with privacy legislation. We assist organizations with their personal information management systems: drafting comprehensive privacy policies and procedures; advising with respect to the use, collection and disclosure of personal information. We evaluate Privacy Impact for clients' businesses or organizations.
