

Patent Lawyer Abbotsford

Patent Lawyer Abbotsford - Our Intellectual Property lawyers understand that for numerous companies their intellectual property is their most valuable asset. Intellectual property is a key component in retaining and attracting market share. It defines your company in the market place, whether through trademarks which identify your product, patents that exclude competitors, or copyright which stops illegal replication of your intellectual assets.

We have many years of skill within the practical management and effective resolution of intellectual property disputes at all levels of the courts. Our clients consist of a wide range of trades, from start-ups to global companies.

Our firm believes that the main concern must be the client's goals and what makes sense from a business point of view. Not each and every infringement of intellectual property rights necessarily warrants a court action. Intellectual property litigation is expensive because of the complexity of comprehensive analysis of rights and utilizing right experts. Where infringement disputes are simple and straight-forward, disputes often can be solved through negotiated arrangements along with built in deterrence terms. In conditions where court action is needed, we use methods which are compatible with a business-oriented approach.

Our lawyers are knowledgeable in representing clients in intellectual property infringement claims. Whether you are an owner of intellectual property pursuing infringers, or you need defending against allegations of intellectual property infringement, our litigators have the experience to communicate to the courts the technical issues involved. We provide legal advice and representation in disputes connected to trademarks, copyright, patents, domain names, industrial design, trade secrets, interlocutory injunctions ("emergency" relief from infringement awaiting trial) and Anton Pillar Orders (civil search and seizure orders).
